- ✚ Mark Blauer gives a presentation about the CDBG Application for the Town.
- ✚ The reason the Town is reapplying for this grant is because the money ran out before they could replace the water main on Jerome Avenue. The application is due by July 31st, 2024, the grant amount is for approx. 1.5 million dollars. All the necessary advertisement was put in the paper, Town Hall and various places in Town which is a requirement of the application.
- ✚ This program is through the US Dept. of HUD, the money is given to the State of New York from the US Congress, and it is then distributed to smaller towns that don't get direct HUD money.
- ✚ This money is given to projects that fall under certain guidelines; water/sewer project, people with a different variety of incomes, engineering process needs to be complete, and they need the environmental process started, project needs to start within 6 months of the contract and must be done within 2 years. These deadlines are very strict.

- ✚ Town should have to use the census to show the types of resident incomes within the Water District, if not the census, the Town will have to do an income survey which can take a while. This survey can be used for more than just water/sewer and also more than just Jerome Ave.
- ✚ Blauer states that if you cannot use the current census then do not apply for the grant yet, an income survey would take too long to apply before the deadline. Will need to reapply at another time; next year, once the survey is complete, the Town does not want to waste money. Blauer should know if the income survey will be accepted in the next week; they should accept it if it is within at least a 5 year span.
- ✚ If 51% of the water district say they are below a certain amount the town is in the right direction, this is only the residents within the water district. If the water district doesn't match the census district; could the water district be changed to match the census?
- ✚ Mary Finneran addresses that this project is to replace the pipes on Jerome Ave.; *Yes*. She then asks if they are aware of the PFOS contamination levels within the water; *they are not too familiar with them*. Could filtration be included within this grant? *Yes, but there may be better ways and better grants for this types of contamination*. Will SEQR be included in this project; *yes, it is required in the application for the environmental process*.
- ✚ The cost of doing the application through Mark would be \$3,750 half when started and the other half when complete.
- ✚ If the census is not allowed, they recommend applying next year and getting an updated income survey. Someone will come down to explain and show what would need to be done. Surveys would be sent out by mail first and then notification would go out to the public. They would need as many people as possible to take the survey within the water district.
- ✚ There are about 782 residents that belong in the water district; approx. 400-500 households. About 30-40 households on Jerome Avenue to be affected.
- ✚ Required in the application; the meeting minutes, proof of advertisement of a public hearing and that it was also held with a quorum of the Town Board. No action needs to be taken tonight pertaining to resolutions.
- ✚ Ed Forrester asks if the Town is any closer to actually getting the water line done then 3 years ago, this has been ongoing for that long. *Blauer is not completely sure, he states that this is the first time he has been here for 40 years or so. The other gentlemen that is here from Delaware Engineering states they are trying to get funds*.
- ✚ Council Member Cords asks how much in funds will this project cost and how much are they trying to get? *The project should be about 1 million dollars; trying to find other places to get funds and not have the Town pay for it*. The Town would not be able to spend that amount of money from the water/sewer district, it wouldn't be right for the paying customers.
- ✚ Mary Finneran asks if this would include repairing Jerome Avenue itself since the road was just repaired. *Yes, this would be included in the price*.
- ✚ They will let the board know as soon as they get the answer if the current survey/census can/can't be used for the application.
 - Offered by Council Member Bogins and seconded by Council Member Murphy.
 - Closed @ 7:32PM

Supervisor Watts – Absent, Council Member Bogins – Aye, Council Member Cords – Aye, Council Member Flaherty – Aye, Council Member Murphy – Aye. Motion Carried.

- Clean up Pond Access from Pocket Park – Les Armstrong
 - The pond is behind the pocket park, it connects Main Street to the Park. The CDF is interested in helping/donating, there are also grants for this type of work. The local fish and game club that Les is a part of is also interested in assisting with cleanup and donations.

Les has spoken with the Lucy Baeckmann, the Rotary, the Chamber of Commerce, and the Bank of Greene County, he will be speaking with Mr. Don Gibson as well about having a hand in this project and possibly getting donations from each party.

Questar students may also be interested coming in and doing some work as long as the fuel is paid for, through the heavy equipment program. Will have to get an estimated amount of how much fuel is worth a week at the Questar Program and estimate how long the project will take to figure out a number for donations. Les would need to put in an application and propose to have the work done for the project, this is also to make sure they have the time to do it.

While Les currently figures out how much money it would cost he has to go about setting up an account since this is simply volunteer, Les is not part of a group that already has an account, and he could not put money and take money out of there fish and game group.

Ideas of having the Highway assistance, a possible wood chip path, etc.

Discussion to be continued about possible Bank Account.

Old Business:

- 460 Main Street

- Jerry Buckley speaks on behalf of 460 Main Street and hands pictures to the board. The outside has been cleaned up; grass moved, trash was picked up, plywood off of the 1st floor doors, cement flower pots are outside and windows have been ordered.

Can't do much more structural work without discussing with building and code and allowing him to go into the building. He will put the windows in when they come in and will either change or patch up the burnt parts on top until property is actually in his name.

Closing is still set for summertime; July.

Tal has spoken to Stacey about this so that this project can move forward.

Council Member Flaherty states the project is still out to bid and will be put back out since there were no interests last time. This is due to the fact that if the interested gentleman that wants to purchase the building cannot then the Town would like to demo the building.

Resolution No. 2024-115 "Advertise for Bid – Dog Park Shade Structure"

Public Comment:

- The CDF will be starting Friday June 7 cleaning the rocks out of the Memorial Fountain in Town with the assistance of the Highway Department.
Warner Masonry is starting on Monday to repair around the fountain. The CDF is also trying to reach out the County to see if they would assist in repairing the curbs where the plows hit each year. The fountain will be sealed and the electric will be fixed.
- Sherry True asks on behalf of her mother, if any of the board have talked to the seniors about the ‘senior’ exercise equipment that has been agreed on to be purchased and put on the park walking path. Wondering if the seniors are okay with it since there money may be used along with the ARPA funds that were also approved for this purchase; this money is to be donated and used on the seniors from the American Legion. If the equipment being purchased is not designated for the seniors the money from the American Legion cannot be used, ARPA funds only.
Also trying to determine where these equipment stations will be and how spread out they would be from each other.
