**Subject:** Round Top

Please consider this email an angry rebuke from a local that is extremely concerned about the lack of forethought you and the planning board have put into letting the Blackhead megadevelopment proceed without detailed plans to address the water and environmental concerns of this ENTIRE community.

If there is no concern, then there is no reason to ask the developers to conduct the proper studies to ensure the water supply downstream is not as severely impacted as the current studies prove.

Can you please explain to us WHY this is moving forward without the studies your community and tax base is demanding?

Sincerely  
Colleen Quinn
