Subject: REJECT LESS INTENSIVE REVIEW

It is an absolute travesty to play "fast and loose" with the Blackhead development project.

I hope whoever reading this remembers summers cooling off in the pristine freshwater stream and winters gathering around the firepit at night looking at the beautiful night sky with no light pollution. I always wanted my grandchildren to experience the same.

This project is ABSOLUTELY in our backyards.

If a formal extensive review determines that it will not disrupt local drinking water and/or increase light pollution then I am less inclined to object.

Why would we not take the reasonable measure of inspection to ensure the health & safety for us and our neighbors?!

Sincerely,
Paul Bryant
Cairo Resident
